Marcus Brooks

Web Developer

Rockville, MD, 20850
(304)433-2552
MarcusBrooksWebDev@gmail.com

SKILLS

Languages: HTML5, CSS3, Javascript

Databases & Frameworks: React.js, Redux.js, Node.js, Express.js, PostgreSQL

Version Control: Git, Github

PROJECTS

You can view live versions of all of these projects at my portfolio website; https://www.marcuswebdev.com!

Rainbow Angles - https://github.com/MarcusWebDev/rainbowAngles

A guide website for a video game named Rainbow Six Siege. Features a reusable image carousel component. Made using React.js and Redux.js.

Smart Brain -

Front end: https://github.com/MarcusWebDev/smartbrain

Back end: https://github.com/MarcusWebDev/smartbrainapi

A face recognition app that uses React.js and features a functional sign in/out and register feature. This app also has its own server and database written in Express.js and PostgreSQL respectively.

Robofriends - https://github.com/MarcusWebDev/robofriends

An app that fetches a list of users, filters the list of users based off of text input, and displays cards with the user's data. Written in React.js and Redux.js.
